

INBE INBO

An innovation that will change your riding life

Wheelswing

The ultimate bike generator, light,
easy and comfortable "Wheelswing"

WHEELSWING[®]
Contactless Cycle Dynamo

Wheelswing Volt 1 Plus

Magnetically powered
and charged non-contact bicycle generator

WHEELSWING[®]
Contactless Cycle Dynamo

Non-contact Bicycle Power generator

Wheelswing Volt 1 Plus

The WheelSwing Volt 1 Plus applies the principle of the Arago disk to induce a magnetic field on the rim of the bicycle wheel and uses the electromagnetic force generated to drive a generator and generate electricity to charge a lithium battery or an external device connected to the USB terminal. It is a small but useful bike generator. The Wheel Swing Bolt 1 Plus applies the principle of the Arago disk to induce a magnetic field on the rim of the bicycle wheel and uses the electromagnetic force generated to drive a generator and generate electricity to charge a lithium battery or an external device connected to the USB terminal. It is a small but useful bike generator. There is no need to experience wheel wear, noise, vibration, and strong pedal rotation resistance, which are inconvenient factors of conventional friction generators.

Easy Installation

Front/Rear wheel,
whenever you want

Generate electricity without any limit

Just by pushing the pedals

Easily charge while riding

With a USB cable

Comfortable Riding

Without a loss of
power & Friction

Faster charging

You can change to 'contact method'
by changing the rubber ring

Usable on any kinds of bicycle

Aluminum or any other
non-ferrous metal rims

Usable

Even while the wheels
are stationary

non-contact
operation method

Change rubber ring
